

## Steffan Soule's Magical Fir Tree

Reuse newspaper to create a magical fir tree. Share it with your family and friends. Tell them that when we recycle one ton of paper we save the equivalent of 17 trees and 7000 gallons of water. That's a lot of paper, trees and water!

### What you'll need:

4 half sheets of newspaper

Glue stick

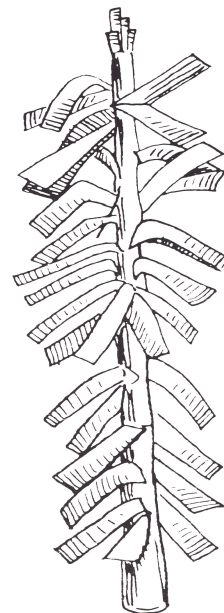

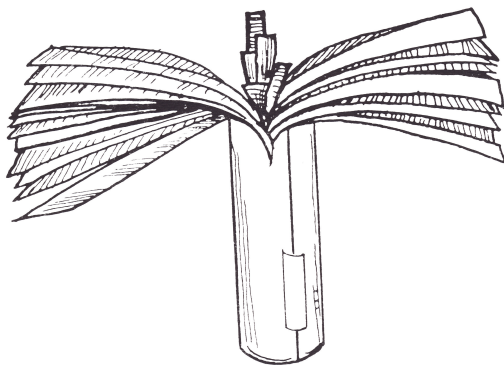

Tape

Scissors

1. Glue the 4 pieces of newspaper together short end to short end. You should now have one very long and narrow piece of newspaper.
2. Roll the newspaper up and tape it closed as shown.
3. Make 4 cuts on one end of the paper as shown by the dotted lines.

4. Your cut paper should look like this:

5. Hold the bottom of your newspaper roll in one hand. With the other hand gently pull the inside of the paper up to create the Magical Fir Tree!
